

Product Backlog

| no. | Stories | Acceptance Criteria | Story Points | Value Points | Value for P |
|-----|--|---|--------------|--------------|-------------|
| 1 | As a user, I want to be able to see what the webapp is about and who created it so that I can know what to do with it & maybe contact the creator. | - Have an "about" page that shows what it's about and shows contact information. | 3 | 5 | 1.666666667 |
| 2 | As a user, I want to upload most image formats so that I don't have to worry about converting images. | - Have an upload function that accepts & displays most common image formats. | 5 | 13 | 2.6 |
| 3 | As a student-developer, I want to have the site read & write from/to the database when pressing ok/not ok so that I can finally have a working like/dislike function. | - Have the site modify/read the database when the ok/not ok buttons are pressed - Also have the site read that part of the database every time the page loads. | 13 | 55 | 4.230769231 |
| 4 | As a student-developer, I want to research/review Django so that I can start creating the backend of one of the wireframes. | - Review videos and websites regarding Django. | 13 | 55 | 4.230769231 |
| 5 | As a student-developer, I want to research MySQL so that I can make the database part of the backend. | - Review videos and websites regarding MySQL. | 13 | 55 | 4.230769231 |
| 6 | As a student-developer, I want to make a video regarding scrum (w/ PDF) to finish the 1st part of Sprint 3. | - Start making the document for the scrum application. - Record a video of such. | 13 | 55 | 4.230769231 |
| 7 | As a student-developer, I want to make a video regarding Backend Programming (w/ source code) to finish the 2nd part of the Sprint 3. | - Start coding the site's Backend using Django. - Record a video explaining Django & part of the code. | 21 | 55 | 2.619047619 |
| 8 | As a student-developer, I want to make a video regarding the Database (w/ source code) to finish Sprint 3. | - Start coding/setting up the site's MySQL Database. - Record a video of such. | 21 | 55 | 2.619047619 |
| 9 | As a student-developer, I want to have the site read from the database every refresh regarding the time left to have the timer be the same when the site is loaded on different computers. | - Make the site read the database and correctly display the time left for the upload button to be enabled | 13 | 55 | 4.230769231 |
| 10 | As a user, I want to be able to upload images when pressing the blue upload button so that I can finally replace the current image with my own. | - Make the user able to select an image to upload & then write such image to the database. | 21 | 55 | 2.619047619 |
| 11 | As a user, I want to be able to download the image when clicking it so that I can also get a copy of it if I fancy such image. | - Make the site read from the database & download the image when the image is clicked. | 8 | 13 | 1.625 |
| 12 | As a student-developer, I want to have the site write to the database regarding the time left so that I'll that the timer can be set. | - Make the site write to the database every time something is added/removed from the time. - Set the time left to the default of 1hr when an upload finishes. | 13 | 55 | 4.230769231 |
